- Full/half duplex transfer mode for each port (200 Mbps)
- Flow Control for Full-Duplex
- Supports 1 Mbit RAM for frame buffering
- Metal case

WHY TO BUY

The Switch with its small, compact size was specifically designed for small to middle workgroups.

The Switch combines dynamic memory allocation with store-and-forward switching to ensure that the buffer is effectively allocated for each port. Auto-MDI function supports automatic MDI/MDIX crossover detection function gives true 'plug and play' capability without the need of confusing crossover cables or crossover ports.

Flow control for any port. This minimizes dropped packets by sending out collision signals when the port's receiving buffer is full.
